

Position: Geological Summer Student

Overview:

Teine Energy Ltd. is a private oil and gas company focused on oil plays in Saskatchewan and Alberta. We are currently looking for an Geology summer student to join our team in the Calgary head office. The position is an opportunity to complete one or more geological mapping and prospect generation projects in an integrated team environment. As part of the exploration and development team, the individual will provide geological support, promoting strong technical skills and value adding workflows. This position will be available for a 4-month term starting on May 1, 2019.

Summary of Duties:

Prospect Generation

- Utilizing geological workflows and methods, the candidate will be responsible for compiling, interpreting and mapping geological and reservoir characteristics, integrating core analysis, pressure analysis, production and type curve analysis for prospect generation within an assigned project area
- High grading and recommending areas for future land acquisition potential &/or future drilling programs
- Learning to use relevant computer applications
- Engage in consistent data management and time management

Operations

- In combination with the development geology team, build and plan at least 2 horizontal wells
- Shortly thereafter, the candidate would then head to the rig to drill these wells with the wellsite geology team and report back to the office geologist
- Embrace and contribute to Health, Safety and Environmental at all times

The candidate will be expected to present all project results to the team and management at the end of summer term and in update sessions where required.

Preferred Qualifications and Skills:

- Eligible candidates will have completed their 3rd or 4th year of a BSc of Geology program as of April 2019 or be enrolled in Masters of Geology program
- Motivated individual with a desire to learn and develop skills
- Must be able to integrate well within a team and office environment
- Prior experience in oil and gas would be an asset

Please apply online by January 31, 2019 and submit your resume to <http://www.teine-energy.com/careers/apply-online>

We appreciate the interest of all applicants, however, only those candidates to be interviewed will be contacted.
